Undergraduate student of Computer Science and Engineering with programming language and problem-solving experience. I am very passionate about new technologies. My field of interest is machine learning, full-stack web development and data science.

Programming Skills

EXPERTISE: HTML5, CSS3, Bootstrap, JavaScript, C/C++, React JS, Data Structure, Algorithm.

COMFORTABLE: Node JS, Express JS, Mongo DB, Firebase, SASS, Python, Material UI

FAMILIAR: Graph QL, Gatsby JS, Redux, PostgreSQL, MySQL,

TOOLS: Git, Heroku, Netlify, VS Code, Anaconda, Chrome Dev Tool, PyCharm, Postman.

PROJECTS

Creative Agency:

- A full stack fully responsive web application about an IT service Provider, where user can place an order check his/her all status and give a feedback which also render in UI.
- In admin panel admin can update user status, make a new admin and also added new services.
- **Technologies:** React JS, React Bootstrap, React Spring, React Router, React Multi Carousal, React Hook Form, Font Awesome Icon, Node JS, Express JS, Mongo DB, Firebase, Heroku

Live Site   Git Repository

Travel Guru:

- An exclusive looking web application about a travel agency, were user can book for a place. Also using firebase hosting and authentication and show the selected place with google map.
- **Technologies:** React JS, React Bootstrap, React Router, React Hook Form, Font Awesome Icon, React Leaflet

Live Site   Git Repository

COVID 19 Tracker:

- Single page web application where you can get the all the information about the COVID-19 in entire world. It has awesome functionality and interactive look with google map and graphical representation.
- **Technologies:** React JS, Material UI, React Leaflet, React Chart JS, Netlify

Live Site   Git Repository

Photo OCR (AI Project):

- Single page web application where you can convert all of the text in a picture to text format.
- **Technologies:** React JS, React Bootstrap, Tesseract JS, Netlify

Live Site   Git Repository

Face Movement (AI Project):

- A web-based AI application where it can detect the facial movement such as mouth open/close, eye open/close.
- **Technologies:** React JS, React Bootstrap, Web GL, Netlify

Live Site   Git Repository

COURSES

- Full Stack Web Development.
  Organization: Programming Hero.
  see credentials

- Deep Learning Specialization
  Organization: Coursera.
  see credentials

- DeepLearning.AI TensorFlow Developer Specialization
  Organization: Coursera.
  see credentials

- SQL For Data Science
  Organization: Coursera.
  see credentials

- Applied Machine Learning in Python.
  Organization: Coursera.
  see credentials

EDUCATION

- BSc Engineering in CSE
  Bangabandhu Sheikh Mujibur Rahman Science & Technology University
  Level 4 – Semester 2

LANGUAGE

- Bangla – Native Language
- English – Working Capability

PUBLICATION

- Paper: Early Stage Autism Spectrum Disorder Detection of Adults and Toddlers Using Machine Learning Models (Online version not published yet)
  Event: 5th International Conference on Electrical Information and Communication Technology (EICT), KUET
  Technical Co-Sponsor: IEEE

Other Skills

- Volunteer at Bangladesh Mathematics Olympiad
- Volunteer at National High School Programming Contest
- Member at BSMRSTU programming club
- Member at BSMRSTU debating society
